Mohali, Punjab | +91-8708399154 | [aryandahiya0416@gmail.com](mailto:aryandahiya0416@gmail.com) | [linkedin.com/in/aryan-dahiya](https://linkedin.com/in/aryan-dahiya) | [github.com/aryan0416](https://github.com/aryan0416)

## EDUCATION

### Chandigarh University

Mohali, Punjab

*Bachelor of Engineering in Computer Science (Artificial Intelligence & Machine Learning)* Expected Grad: July 2028

- **CGPA:** 9.08/10.0
- **Relevant Coursework:** Data Structures, Algorithms, Artificial Intelligence, Operating Systems, Computer Architecture

## TECHNICAL SKILLS

**Languages:** Python, Java, Go, SQL

**Cloud & Modern Tech:** Artificial Intelligence, Machine Learning, Cloud Technologies, Big Data, Data Warehousing

**Methodologies & Tools:** Agile Methodologies, CI/CD, Application Resiliency, Security, Git, Docker, Kubernetes

**Databases:** Relational Databases (PostgreSQL, MySQL)

## PROJECTS

### Cloud-Native Microfinance Engine | *Java, Python, PostgreSQL, Docker*

Jan 2026

- Architected a resilient web application to manage micro-loans for social good organizations, managing projects end-to-end to keep stakeholders up to speed.
- Created and improved the core design and coding of the backend, utilizing relational databases (PostgreSQL) for secure transaction processing.
- Integrated Agile methodologies and CI/CD pipelines to automate software testing, ensuring high application resiliency and continuous software improvement.

### AI-Powered Financial Fraud Detection System | *Python, Machine Learning, PostgreSQL*

Nov 2025

- Developed a machine learning model to detect fraudulent financial transactions using supervised classification on transaction datasets.
- Performed feature engineering and preprocessing on 100K+ transaction records, improving fraud detection accuracy to 92%.
- Built a backend pipeline integrating the ML model with PostgreSQL to enable real-time transaction monitoring and automated fraud flagging.

### Distributed Transaction Processing API | *Go, Relational Databases, Agile, Security*

Sep 2025

- Engineered a high-scale, collaborative backend API in Go designed for electronic payments, reflecting enterprise technology initiatives.
- Applied strict security protocols and best practices during development to safeguard sensitive financial data.
- Collaborated in a fast-paced environment utilizing Agile workflows to rapidly prototype and test new product features.

## CERTIFICATIONS & ACHIEVEMENTS

**Certifications:** Oracle Certified Professional - Oracle Cloud Infrastructure Generative AI (2025) (Demonstrates baseline knowledge of AI and Cloud).

**Competitive Programming:** LeetCode rating 1688 (Top 14% globally), demonstrating strong data structures and algorithmic problem-solving skills.

**Problem Solving:** Codeforces Div. 3 Rank 400; showcases exceptional problem-solving ability essential for fast-paced environments.

**Hackathons:** Smart India Hackathon (SIH) & Zinnovatio 3.0; demonstrated ability to work in collaborative teams to achieve goals.

**Aspire Leaders Program (Aspire Institute):** Selected for a global leadership development program focused on leadership, professional skills, and social impact.

## LEADERSHIP & EXTRACURRICULAR

**Webmaster, IEEE Communications Society (ComSoc):** Manage organizational web presence, utilizing developmental toolsets and strong interpersonal skills.

**Professional Development:** Active member of ARISE Club and McKinsey.org Forward Program (Super Learner), demonstrating a drive to develop through on-going training.
